Healthcare Construction Specialists

Building the Future of Healthcare

CNC Contractors Corp.

Who We Are:

CNC is a healthcare construction specialist, building hospital additions and completing renovations for more than twenty-five hospitals serving many health systems. **CNC** delivers **Construction and Project Management** services utilizing proven project management fundamentals. Successfully completed projects range from complete new structure to minor repairs. In every endeavor CNC provides quality, dedication and communication.

Goals and Objectives:

Provide quality projects reflecting current healthcare trends merged with preferred delivery methods including design-build, Multi Prime, GMP, or negotiated cost plus. By applying sound principles to clearly define a scope or desired result; team goals become the focus. Project success for CNC is defined by team success on every project.

Experience:

For over 25 years CNC Contractors has been a full service General Building Contractor with a focus on healthcare specific, institutional construction. CNC's leadership team are all healthcare savvy, providing more than 50 years combined hospital construction knowledge and experience.

How Can We Help Your Building Program:

With ample healthcare experience throughout Southern California, CNC will deliver comprehensive services including planning, construction management and construction. **CNC strives to become your preferred provider for construction services. We have what it takes to make your next project a success.**
